

P E T I T I O N

We, the undersigned citizens of _____ do hereby call on and petition our elected officials to amend and improve our Municipal Code as it pertains to the design, construction and operation of so-called "small cell" wireless antennas in our community. Such amendments and modifications are required to serve the public interest and protect public health and safety. These modifications shall include:

- A provision authorizing the Town to conduct random, unscheduled and independent testing of any wireless antennas installation to ensure its compliance with the Federal Communications Commission's radiofrequency radiation guidelines for the general public;
- A provision requiring certification and documentation that any proposed small cell installation(s) addresses an existing and significant gap in coverage in the service area;
- A provision requiring photo simulations of the proposed installation(s) from the perspective of any property owner within 250 feet.
- A provision requiring documentation that the applicant has exhausted every possible alternative to locating the antenna in or near any residential area, school, daycare center, playground, park or other area where children spend time.
- A provision that all property owners within 250 feet of any proposed installation(s) have been notified of the filing of an application for a permit within five days of such filing, and that the application, including all related documents, shall be made available for public inspection and copying.

We respectfully request a public meeting to address these issues at the earliest possible time.
